DATE MAILED: 07/21/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 09/761,149	<b>Applicant(s)</b> PELED ET AL.	
	<b>Examiner</b> Firas Alomari	<b>Art Unit</b> 2136	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 17 January 2001.
- 2a) ☐ This action is **FINAL**.      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-32 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-32 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### ***Claim Objections***

### ***Specification***

1. The disclosure is objected to because of the following informalities: the serial number of the copending application mentioned on page 1 is missing.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeung et al. US(6,668,246) in view of Yamamoto et al US (6,259,506).

Regarding claims 1 & 17: Yeung discloses a method for secure distribution of digital content, the method comprising the steps of:

Art Unit: 2136

Dividing a unit of digital content into at least first and second portions (*Col 3, lines 60-64*); storing said first portion on a first computerized apparatus (*Col 7, lines 12-21*); but he doesn't disclose digitally watermarking second portion and storing the second content on a second computerized apparatus. However Yamamoto discloses a digital media processing system (*Col 7, lines 57-67*) where he teaches dividing the data content into at least tow portions (*Col 18, lines 58-65 & FIG. 2*) and digitally watermarking the second portion of the content (*Col 19, lines 19-29 & Col 21, lines 4-17*) before recombining the content to play it. Therefor it would have been obvious to one ordinary skilled in the art at the time the invention was made to modify Yeung system with the teachings of Yamamoto to digitally watermark the second portion of the content before recombining the content again. One would be motivated to do so in order to reduce the size of the content that needs to be watermarked by the system, which ultimately speeds the system processing time.

Combining said first portion and said digitally watermarked second portion: thereby forming a watermarked version of said digital content (*Col 7, lines 35-43*)

Regarding claims 2, 12, 18 & 28: Yeung discloses the method according to claim 1 wherein said dividing step comprises dividing said digital content into at least first and second portions, wherein each of said portions comprises non-contiguous segments of said digital content (*Col 7, lines 35-43 & Col 8, lines 21-28*).

Art Unit: 2136

Regarding claims 3 & 19: Yeung doesn't explicitly disclose the dividing step comprises dividing said digital content into at least first and second portions, wherein said first portion is larger than said second portion. However Yamamoto discloses a digital media processing system (*Col 7, lines 57-67*) where he teaches dividing the data content into at least two portions (*Col 18, lines 58-65 & FIG. 2*) wherein the second portion is smaller than the first portion (*Col 19, lines 19-38/ a fixed size portion and a variable portion*) before recombining the content to play it. Therefore it would have been obvious to one ordinary skilled in the art at the time the invention was made to modify Yeung system with the teachings of Yamamoto to make the second portion of the content smaller before watermarking the content. One would be motivated to do so in order to reduce the size of the content that needs to be watermarked by the system, which ultimately speeds the system processing time.

Regarding to claims 4 & 20: Yeung discloses the method according to claim 1 wherein said dividing step comprises dividing said digital content such that a qualitative measure of either of said first and second portions is degraded relative to a corresponding qualitative measure of said digital content (*Col 6, lines 21-32*).

Regarding claims 5 & 21: Yeung discloses the method according to claim 1 wherein said dividing step comprises dividing said digital content such that either of said first and second portions are individually inoperable. (*Col 4, lines 13-20*)

Art Unit: 2136

Regarding claims 6, 13, 22 & 29: Yeung disclose the method according to claim 1 wherein said storing said first portion step comprises storing on a proxy server.

(Col 4, lines 57-65 & item 110 of FIG. 1)

Regarding claims 7 & 23: Yeung discloses the method according to claim 1 wherein said digitally watermarking step comprises uniquely watermarking the entire content but doesn't disclose the watermarking just for the second portion of the content. However Yamamoto discloses a digital media processing system (Col 7, lines 57-67) where he teaches dividing the data content into at least two portions (Col 18, lines 58-65 & FIG. 2) and digitally watermarking the second portion of the content (Col 19, lines 19-29 & Col 21, lines 4-17) before recombining the content to play it. Therefore it would have been obvious to one ordinary skilled in the art at the time the invention was made to modify Yeung system with the teachings of Yamamoto to digitally watermark the second portion of the content before recombining the content again. One would be motivated to do so in order to reduce the size of the content that needs to be watermarked by the system, which ultimately speeds the system processing time.

Regarding claims 8, 14, 24 & 30: Yeung discloses the method according to claim 1 and further comprising the steps of: receiving a request from a requestor for said digital content (Col 4, lines 21-38); and sending said watermarked version of said digital content to said requestor (Col 5, lines 48-65).

Art Unit: 2136

Regarding claims 9, 15, 25 & 31: Yeung discloses the method according to claim 1 wherein said combining step comprises combining at either of said computerized apparatus. (Col 7, lines 35-43)

Regarding claims 10, 16, 26 & 32: Yeung discloses the method according to claim 1 wherein said combining step comprises sending said portions to a third computerized apparatus and combining at said third computerized apparatus (Col 9, lines 23-31).

Regarding claims 11 & 27: Yeung discloses a method for secure distribution of digital content (See Abstract), the method comprising the steps of: dividing a unit of digital content into at least first and second portions (Col 3, lines 60-64) but he doesn't disclose the first portion is larger than said second portion. However Yamamoto discloses a digital media processing system (Col 7, lines 57-67) where he teaches dividing the data content into at least two portions (Col 18, lines 58-65 & FIG. 2) wherein the second portion is smaller than the first portion (Col 19, lines 19-38) before recombining the content to play it. Therefore it would have been obvious to one ordinary skilled in the art at the time the invention was made to modify Yeung system with the teachings of Yamamoto to make the second portion of the content smaller before watermarking the content. One would be motivated to do so in order to reduce the size of the content that needs to be watermarked by the system, which ultimately speeds the system processing time.

Art Unit: 2136

Yeung discloses wherein said dividing step comprises either of:

dividing said digital content such that a qualitative measure of either of said first and second portions is degraded relative to a corresponding qualitative measure of said digital content (Col 6, lines 21-32), and dividing said digital content such that either of said first and second portions are individually inoperable (Col 4, lines 13-20); storing said first portion on a first computerized apparatus (*Col 7, lines 12-21*); storing said second portion on a second computerized apparatus (Col 5, lines 5-15); and combining said first portion and said second portion, thereby recreating said digital content (*Col 7, lines 35-43*).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Firas Alomari whose telephone number is (571) 272-7963. The examiner can normally be reached on M-F from 7:30 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, AYAZ SHEIKH can be reached on (571) 272-3795. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2136

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
